Clinical guidance is available at the end of this article.

Accepted September 26, 2017

Dr. Choi is with University of California, Los Angeles. Drs. Seng, Munro-Kramer, and Graham-Bermann are with University of Michigan, Ann Arbor. Dr. Briggs-King and Mr. Lee are with Duke University, Durham, NC. Dr. Ford is with University of Connecticut, Mansfield.

This research project was supported by the Rita & Alex Hillman Foundation, Hillman Scholars Program in Nursing Innovation (predoctoral fellowship) and the Eunice Kennedy Shriver National Institutes of Child Health and Human Development (NICHD) at the National Institutes of Health (NIH) through an individual National Research Service Award (NRSA) (1F31HD088091-01). This project was developed (in part) under grant number 2U79SM054284 from the Center for Mental Health Services (CMHS), Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS). The views, policies, and opinions expressed are those of the authors and do not necessarily reflect those of the above funding sources.

Mr. Lee served as the statistical expert for this research.

The authors would like to acknowledge the 56 sites within the NCTSN that have contributed data to the Core Data Set as well as the children and families that have contributed to our growing understanding of child traumatic stress. Tracy Bethel, MPH, Carrie Purbeck-Trunzo, MHA, CPHQ, and Courtney Fleck, data technician, of the National Center for Child Traumatic Stress (NCCTS) at Duke University School of Medicine, facilitated access to the dataset used in this project and provided technical assistance throughout the study.

Disclosure: Dr. Ford is a co-owner of Advanced Trauma Solutions, Inc., which is the sole distributor of the copyrighted TARGET model by the University of Connecticut. Drs. Choi, Seng, Briggs-King, Munro-Kramer, Graham-Bermann, and Mr. Lee report no biomedical financial interests or potential conflicts of interest.
