This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Drivers of integrated lean and green manufacturing are selected through literature review and experts' opinions.
- A MCDM approach is used for ranking of drivers for integrated lean and green manufacturing for Indian manufacturing SMEs with environmental, social and economic perspectives.
- In this paper TOPSIS and SAW methodologies are used in fuzzy environment to make model closer to real life situation.
- Sensitivity analysis is performed to examine the influence of criteria weights on ranking of drivers.
