Predicting economic growth with stock networks

Raphael H. Heiberger

PII: S0378-4371(17)30710-0

DOI: <http://dx.doi.org/10.1016/j.physa.2017.07.022>

Reference: PHYSYA 18439

To appear in: *Physica A*

Received date: 11 February 2017

Revised date: 25 May 2017

Please cite this article as: R.H. Heiberger, Predicting economic growth with stock networks, *Physica A* (2017), <http://dx.doi.org/10.1016/j.physa.2017.07.022>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Combining Econophysics with Machine Learning techniques
- Utilizing Bayes classifiers to predict economic growth with stock networks
- Correctly forecasting critical (and prosperous) economic developments in the US up to one year ahead
- Derivation of the future status of whole networks based on the present local positions of nodes
