This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The difference between the male and female labor wedges has been decreasing in Japan.

Productivity, housework, and discrimination account for 71% of the female labor wedge.

If the female labor wedge is equal to male one, welfare could increase by 1.44%.
