Statement: This research has never been presented or published. This project was supported by Grant No. 2016-PM-BX-K005 awarded by the Bureau of Justice Assistance. The Bureau of Justice Assistance is a component of the Department of Justice's Office of Justice Programs, which also includes the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Office for Victims of Crime, and the SMART Office. Points of view or opinions in this document are those of the author and do not necessarily represent the official position or policies of the U.S. Department of Justice.

Highlights

- Propoxyphene-involved deaths declined 84% two years following market withdrawal
- Propoxyphene has been detected in recent deaths and other drug data sources
- Drug surveillance should continue post-withdrawal with a systematic phase-out
