This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Compressed air energy storage (CAES) system is considered in electricity market.
- Optimal operation of CAES is optimized to determine the charge and discharge decision.
- Uncertainty model of electricity market price is considered in the proposed model.
- Electricity market price uncertainty is modeled using robust optimization approach.
- Offering and bidding curves of CAES obtained based on robust optimization approach.
