This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We propose a panel data sample selection model with state dependence.
- Our framework may reconcile previous conflicting empirical evidence.
- Effects of IMF program participation on output vary systematically with countries' institutional record.
- Effects are significantly positive only if there is sufficient improvement of the institutional record.
