This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

The sorghum drinks had high acceptance and purchase intention.

Both sorghum powdered drinks mixes were low fat and sources of fiber and proteins.

The tannin presence did not negatively influence the acceptance of the drink.

The tannin improved the functional properties of the sorghum drink.

Sorghum has potential to be an ingredient of functional and gluten-free food.
