This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Analyze a two-product inventory model with price- and stockout-based substitution.
- Derive structural properties and closed-form expressions of the optimal solution.
- Compare two approximated pricing policies to the optimal price-inventory decision.
- Reveals the impact of specific demand characteristics by comparative statics.
