This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- This paper discusses preventive replacement for a system affected by the external shock process.
- A system is replaced either on failure, or at T , or on the m -th shock, whichever comes first.
- It provides a comprehensive insight into the preventive maintenance models with two scales.
- By a shock, the failure rate is increased and the output function is decreased.
