This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

highlights

- A generalized geometric process is proposed for maintenance models.
- An age-dependent PM model is constructed based on GGP.
- A sequential PM model is also discussed.
- The optimal policies are studied for the models theoretically and numerically.
