This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An integrated policy of maintenance and vehicle routing with time windows is proposed.
- The optimal routing plan and PM sequence are determined simultaneously.
- It is shown that reliability considerations may affect the vehicle routing decision.
