This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Research Highlights

- *Application of Generalized Neuron Model for electricity price forecasting is shown.*
- *Wavelet transform is used as pre-processing to refine the input data series.*
- *Weights are optimized using the improved environment adaptation method.*
- *Data from electricity market of New South Wales (NSW) is used for testing.*
