This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- The mobile app ecosystem and user reviews contain a wealth of information about user experience and expectations.
- Developers and app store regulators could leverage the information to better understand their audience.
- The automated extraction of app features in online reviews does not consider the nature of the review text.
- Opinion spam or fake review detection is one of the largest problems in the domain.
