This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A fuzzy regression functions with support vector machines approach is proposed.
- The approach is robust against outlier observations and over-fitting problem.
- Estimation accuracy of the model is superior to several existent alternatives.
- A new solar radiation estimation model is proposed for the region of Turkey.
- The model is useful under complex terrestrial and climatic conditions.
