Sensitivity analysis of temperature field in the heated soft tissue with respect to the perturbations of porosity

Grażyna Kałuża , Ewa Majchrzak , Łukasz Turchan

PII: S0307-904X(17)30328-1
DOI: [10.1016/j.apm.2017.05.011](https://doi.org/10.1016/j.apm.2017.05.011)
Reference: APM 11763

To appear in: *Applied Mathematical Modelling*

Received date: 26 April 2016
Revised date: 8 March 2017
Accepted date: 8 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Generalized dual-phase lag equation for axisymmetrical domain is considered.
- Sensitivity analysis is used to estimate temperature changes due to the perturbation of the porosity.
- Numerical algorithm based on the explicit scheme of the finite difference method is proposed.
