This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- New approach for modeling project preference statements is introduced
- Project preferences are modeled on principles of dominance and potential optimality
- Two principles are proven to lead to exclusion of same weights
- The new approach is illustrated by analyzing a real case study
