Accepted Manuscript

Mixed-Integer Linear Programming and Constraint Programming Formulations for Solving Resource Availability Cost Problems

Stefan Kreter, Andreas Schutt, Peter J. Stuckey, Jürgen Zimmermann

PII: \$0377-2217(17)30927-X DOI: 10.1016/j.ejor.2017.10.014

Reference: EOR 14738

To appear in: European Journal of Operational Research

Received date: 3 October 2016
Revised date: 17 September 2017
Accepted date: 10 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We consider the Resource Availability Cost Problem and two extensions.
- One of the extensions is not treated in literature until now.
- Mixed-Integer Linear and Constraint Programming formulations are presented.
- All open instances from literature can be solved to proven optimality.
- We provide new test sets and make them available online.
