Please cite this article as: Mohammad Mohammadi, Kamran Forghani, A hybrid method based on genetic algorithm and dynamic programming for solving a bi-objective cell formation problem considering alternative process routings and machine duplication, *Applied Soft Computing Journal* <http://dx.doi.org/10.1016/j.asoc.2016.12.039>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A hybrid method based on genetic algorithm and dynamic programming  
for solving a bi-objective cell formation problem considering alternative  
process routings and machine duplication**
