This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Making assumptions is inevitable when performing quantitative risk assessment (QRA)
- We suggest a scheme for systematic management of uncertain QRA assumptions
- The scheme supports the development of post-assessment management strategies
- The strategies are based on the so-called Assumption-Based Planning framework
- An example is included to illustrate the use of the suggested scheme
