Deriving Verification Objectives and Scenarios for Maritime Systems
Using the Systems-Theoretic Process Analysis

Børge Rokseth , Ingrid Bouwer Utne , Jan Erik Vinnem

PII: S0951-8320(17)30316-2
DOI: [10.1016/j.ress.2017.07.015](https://doi.org/10.1016/j.ress.2017.07.015)
Reference: RESS 5912

To appear in: *Reliability Engineering and System Safety*

Received date: 16 March 2017
Revised date: 26 July 2017
Accepted date: 28 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A method to improve the impact of verification activities for advanced maritime vessels
- The method specifies verification scope, objectives and acceptance criteria
- Captures scenarios with more complex causal relations than what is currently considered
