5 **Abstract:** Farmers may add chemical additives to crops to enhance their appearances/tastes
6 or decrease their costs, which may also increase the food demand and sales profits. Man-
7 ufacturers buy products from farmers and sell them to consumers, where the government
8 benefits from tax income based on sales revenues. However, once the contaminated food
9 is consumed, customers could get sick. The government would, thus, be partially respon-
10 sible for society's health risks from the chemical additives. The punishment policies are
11 set up by the government to regulate and deter farmers' and manufacturers' risky behav-
12 ior, balancing tax income, punishment income, and society's health risks. Based on the
13 observation of government regulations, the farmers strategically choose the optimal level of
