Accepted date: 31-10-2016

Please cite this article as: Muhammad Ajmal Azad, Ricardo Morla, Early Identification of Spammers Through Identity Linking, Social Network and Call Features, *Journal of Computational Science* (2016), <http://dx.doi.org/10.1016/j.jocs.2016.10.019>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Muhammad Ajmal Azad

Muhammad Ajmal Azad received MS degree in Electronics Engineering from the International Islamic University, Pakistan. Currently, he is working towards the PhD degree in the Department of Electrical and Computer Engineering at the University of Porto, Portugal. His research interests include management and operation of VoIP NGN networks; especially spam identification in a VoIP network, privacy protection and social network analysis.

Ricardo Morla

Ricardo received the PhD degree in Computing from the Lancaster University. He is currently an assistant professor in the Department of Electrical and Computer Engineering U.Porto. His research interests include distributed computer systems and computer networks, with an emphasis on P2P content delivery networks, network management and application of machine learning to the management of IT systems.
