

Accepted Manuscript

Full title: No evidence that schizophrenia candidate genes are more associated with schizophrenia than non-candidate genes

Emma C. Johnson, Richard Border, Whitney E. Melroy-Greif, Christiaan de Leeuw, Marissa A. Ehringer, Matthew C. Keller

PII: S0006-3223(17)31772-9

DOI: [10.1016/j.biopsych.2017.06.033](https://doi.org/10.1016/j.biopsych.2017.06.033)

Reference: BPS 13264

To appear in: *Biological Psychiatry*

Received Date: 8 December 2016

Revised Date: 12 June 2017

Accepted Date: 28 June 2017

Please cite this article as: Johnson E.C., Border R., Melroy-Greif W.E., de Leeuw C., Ehringer M.A. & Keller M.C., Full title: No evidence that schizophrenia candidate genes are more associated with schizophrenia than non-candidate genes, *Biological Psychiatry* (2017), doi: 10.1016/j.biopsych.2017.06.033.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Full title: No evidence that schizophrenia candidate genes are more associated
2 with schizophrenia than non-candidate genes

3 Short title: Classic candidate genes and schizophrenia risk
