This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Significant associations were found between functional impairment and antisocial, avoidant, borderline, obsessive-compulsive, and schizotypal personality disorders in both Section II and Section III..
- Smaller associations were found between impairment and narcissistic personality disorder in both Section II and Section III.
- The Section III trait-based measurement of personality psychopathology showed greater associations with functional impairment.
