This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## CANNABIS AND NEGATIVE AFFECT

**Highlights**

- Cannabis significantly reduced ratings of depression, anxiety, and stress
- Women reported larger reductions in anxiety as a function of cannabis than did men
- Low THC/high CBD cannabis was best for reducing perceived symptoms of depression
- High THC/low CBD cannabis was best for reducing perceived symptoms of stress
- Use of cannabis to treat depression appears to exacerbate depression over time
