This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

- A multimodal, cloud-based m-learning tool for promoting dyslexia is proposed.
- The tool relies on standard educational strategies, which are implemented in SA.
- Customizing the multimodal functionality to meet dyslexic students' learning needs.
- Dyslexic students' Learning capabilities are enhanced by almost 30% using the tool.
