This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Comprehensive survey of monitoring concepts within edge computing frameworks.
- Taxonomy of monitoring requirements needed to support self-adaptive applications in edge computing scenarios.
- Comparison of widely-used monitoring tools for edge computing scenarios.
- Identification of key unsolved challenges in monitoring for adaptive edge computing applications, and future research directions.
