Acknowledgment

Work on this paper was supported by the Irving B. Harris Professorship held by Masten. The results were based on data collected as part of the Project Competence longitudinal study, which has been supported through grants to Ann Masten, Auke Tellegen, and Norman Garmezy from the National Institute of Mental Health (NIMH #MH33222), the William T. Grant Foundation (WTG), the National Science Foundation (NSF # SBR-9729111), and the University of Minnesota. Any conclusions or views expressed in this chapter are those of the authors and do not necessarily reflect the views of NIMH, NSF, or WTG.
