

## Accepted Manuscript

Routine clinical anti-platelet agents have limited efficacy in modulating hypershear-mediated platelet activation associated with mechanical circulatory support

Lorenzo Valerio, Jawaad Sheriff, Phat L. Tran, William Brengle, Alberto Redaelli, Gianfranco B. Fiore, Federico Pappalardo, Danny Bluestein, Marvin J. Slepian

PII: S0049-3848(17)30587-X  
DOI: doi:[10.1016/j.thromres.2017.12.001](https://doi.org/10.1016/j.thromres.2017.12.001)  
Reference: TR 6855  
To appear in: *Thrombosis Research*  
Received date: 10 August 2017  
Revised date: 3 November 2017  
Accepted date: 2 December 2017

Please cite this article as: Lorenzo Valerio, Jawaad Sheriff, Phat L. Tran, William Brengle, Alberto Redaelli, Gianfranco B. Fiore, Federico Pappalardo, Danny Bluestein, Marvin J. Slepian , Routine clinical anti-platelet agents have limited efficacy in modulating hypershear-mediated platelet activation associated with mechanical circulatory support. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
