### **ABSTRACT**

#### **Objective**

The primary aim was to evaluate the use of sexual dissatisfaction as a marker of poor overall health. Secondary objectives were to assess the effect of age on this measure and the utility of the Brief Sexual Symptom Checklist (BSSC) for general practitioners (GPs) and patients.

#### **Material and Methods**

Multicenter, cross-sectional study conducted in Spain among men aged  $\geq 50$  years presenting with mood disorders and/or cardiovascular comorbidities (hypertension, dyslipidemia or diabetes) visiting a GP for any reason. A group of men without these comorbidities was also analyzed.

#### **Main outcome measures**
