Heart Rate Variability Reactivity and New Romance: Cause or Consequence?

Laura K. Bailey & Ron Davis

Lakehead University

Author Note

Laura K. Bailey, Department of Psychology, Lakehead University; Ron Davis, Department of Psychology, Lakehead University.

This manuscript is based on Laura K. Bailey's Master's Thesis. Neither author have any interests that might be interpreted as influencing the research. APA ethical standards were followed in conducting the study.

This research was supported in part by a grant from the Social Sciences and Humanities Research Council of Canada [grant number 766-2012-4040]. This research could not have been conducted without the tireless efforts of research assistants in the Stress, Eating Behaviour, and Body Image Laboratory at Lakehead University. Special thanks to Jennifer Bailey, Danielle Ransom, and Chad Keefe for their insightful critiques of this manuscript.

Correspondence concerning this article should be addressed to Laura K. Bailey, Department of Psychology, Lakehead University, 955 Oliver Road, Thunder Bay, ON, P7B 5E1. E-mail: lbailey1@lakeheadu.ca

Heart Rate Variability Reactivity and New Romance: Cause or Consequence?

Highlights

- The link between the heart and love is supported.
- Heart rate variability does not change when starting romantic relationships.
- Cardiac functioning, along with BMI, predicts who starts romantic relationships.
