Exergy assessment of a refrigeration plant using computational intelligence based on hybrid learning methods

J.M. Belman-Flores , J.M. Barroso-Maldonado , Sergio Ledesma ,
V. Pérez-García , A. Gallegos-Muñoz , J.A. Alfaro-Ayala

PII: S0140-7007(18)30009-4
DOI: [10.1016/j.ijrefrig.2018.01.004](https://doi.org/10.1016/j.ijrefrig.2018.01.004)
Reference: JIJR 3866

To appear in: *International Journal of Refrigeration*

Received date: 15 August 2017
Revised date: 21 December 2017
Accepted date: 8 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A computational intelligence method was proposed to model the exergetic behavior
- An neural network was trained using a hybrid method to model a refrigeration system
- The major exergy destruction was located at the compressor and at the condenser
- New insights to develop methods of analysis for refrigeration systems are proposed
