

## Accepted Manuscript

Title: Caregiver communication to the child as moderator and mediator of genes for language

Author: Luca Onnis

PII: S0166-4328(17)30214-0  
DOI: <http://dx.doi.org/doi:10.1016/j.bbr.2017.02.003>  
Reference: BBR 10695

To appear in: *Behavioural Brain Research*

Received date: 30-9-2016  
Revised date: 1-2-2017  
Accepted date: 2-2-2017

Please cite this article as: Luca Onnis, Caregiver communication to the child as moderator and mediator of genes for language, *Behavioural Brain Research* (2017), <http://dx.doi.org/10.1016/j.bbr.2017.02.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Research Highlights

- Human language is both innate and learned socially via social bonding and attachment with caregivers
- Genetic methods are unveiling the genetic underpinnings of language
- Epigenetics is showing novel gene-environment interactions in behaviour
- We chart possible yet to be discovered epigenetic effects of attachment on language development
