To appear in: *Games and Economic Behavior*

Received date: 15 June 2016

Please cite this article in press as: Andersson, T., Svensson, L.-G. Sequential Rules for House Allocation with Price Restrictions. *Games Econ. Behav.* (2017), <https://doi.org/10.1016/j.geb.2017.10.027>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- We consider a housing market with price restrictions.
- We define a finite ascending price sequence.
- The sequence terminates to a minimal rationing price equilibrium.
- The sequence is also important an Iterative English Auction Rule.
