This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A Bartlett-type correction to the gradient statistic in dispersion models is derived.
- The correction improves the chi-squared approximation when the sample size is finite.
- A comprehensive simulation study compares several different tests in small samples.
- Large sample tests, including the gradient test, may perform poorly in small samples.
- Bartlett and Bartlett-type corrections remove size distortions with no power loss.
