This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Research Highlights

- We study individual status distribution of new social strata in Shanghai.
- We construct and investigate the invisibility similarity network.
- Respondents self-reported in high social positions are in the periphery of the network.
