### **Accepted Manuscript**

Optimal configuration of power distribution networks with variable renewable energy resources

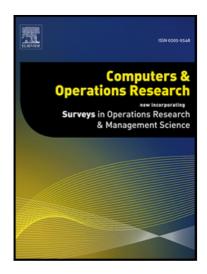

Ellen M.B. Cavalheiro, André H.B. Vergílio, Christiano Lyra

PII: \$0305-0548(17)30252-6 DOI: 10.1016/j.cor.2017.09.021

Reference: CAOR 4333

To appear in: Computers and Operations Research

Received date: 28 February 2017
Revised date: 3 August 2017
Accepted date: 20 September 2017

Please cite this article as: Ellen M.B. Cavalheiro, André H.B. Vergílio, Christiano Lyra, Optimal configuration of power distribution networks with variable renewable energy resources, *Computers and Operations Research* (2017), doi: 10.1016/j.cor.2017.09.021

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

#### ACCEPTED MANUSCRIPT

#### Highlights

- Unveiling optimal configurations for power distribution networks.
- Probing the problem with a maquette network.
- Developing a BRKGA genetic algorithm framework for addressing the problem.
- Finding the best configurations for networks with renewable energy resources.
- Enhancing the benefits of renewable resources with better network topologies.
