This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Create a connection between risk analysis and decision theory
- Pave the way to the use of modern decision criteria in system risk assessment
- All formats of Kaplan and Garrick's risk triplets have a decision theory counterpart
- Promote exchanges between two fields that benefit Decision Analysis practice
