Title: Robust multi-objective optimization for sustainable design of distributed energy supply systems

Author: Dinah Elena Majewski Marco Wirtz Matthias Lampe
André Bardow

PII: S0098-1354(16)30391-X
DOI: <http://dx.doi.org/doi:10.1016/j.compchemeng.2016.11.038>
Reference: CACE 5627

To appear in: *Computers and Chemical Engineering*

Received date: 26-4-2016
Revised date: 29-11-2016
Accepted date: 30-11-2016

Please cite this article as: Dinah Elena Majewski, Marco Wirtz, Matthias Lampe, André Bardow, Robust multi-objective optimization for sustainable design of distributed energy supply systems, *Computers and Chemical Engineering* (2016), <http://dx.doi.org/10.1016/j.compchemeng.2016.11.038>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We design robust sustainable energy systems.
- Uncertainties are incorporated in sustainable design of energy systems.
- We transfer minmax robust multi-objective optimization to engineering practice.
- The effect of different kind of uncertainties on the Pareto front is analyzed.
- Identified robust designs perform well in the worst case and in the nominal case.
