This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A new concept of sequential probability series system is proposed.
- Three optimal allocation models are formulated.
- The analytical optimal solutions are obtained in Model 1.
- A genetic algorithm is proposed in Model 1 and Model 2.
- A Monte Carol method is provided in Model 3.
