This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**HIGHLIGHTS**

- The virtual patients include scenarios of the most common problems seen in midwifery practice: premature birth, stillbirth, homebirth, care for a woman with gestational diabetes and care in a case of ineffective breastfeeding.
- The use of the virtual patients can save teachers' working capacity as well institutional capacity of teaching clinical settings.
- The virtual patients are free accessible and after development of other language mutations can be used also in abroad.
