This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We study the product ordering problem in sequential purchase contexts.
- We propose a framework that combines data with optimization, simulation and econometric methods.
- Our framework allows sellers to compare revenues of limited information sequencing strategies.
- We show that the best performing sequencing strategy depends on buyers' strategic behavior.
- We show that a substantial portion of the revenue difference is associated limited information
