This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A Discrete Water Wave Optimization(DWWO) Algorithm is proposed.
- An Improved Iterated greedy algorithm is integrated into the framework of DWWO.
- A modified initialization strategy is proposed to generate the initial population.
- A ruling out inferior solution mechanism is added to improve the convergence speed.
- The convergence of the DWWO algorithm has been proved theoretically.
