This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Nonlinear sixth-order Boussinesq dynamical equation are considered.
- Bi-directional propagation of small amplitude and long capillary-gravity waves are discussed.
- Symmetrical, non-symmetrical kink, solitary pattern waves, jacobi and weierstrass elliptic function and triangular function solutions are obtained.
