This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A literature review of context analysis approaches is provided.
- An approach that facilitates designing and developing context-aware applications.
- It is described by procedures helping designers to design context-aware applications.
- Performance metrics are calculated and they have very acceptable values.
- The processing time and the overhead of the analysis approach are negligible.
