This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Deficiency in Milk Fat Globule-Epidermal Growth Factor-Factor 8 Exacerbates Organ Injury and Mortality in Neonatal Sepsis

Laura W. Hansen, MD*, Adam Khader, MD*, Weng-Lang Yang, PhD*[#] Asha Jacob, PhD*[#],
Tracy Chen[#], Jeffrey M. Nicastro, MD, FACS*, Gene F. Coppa MD, FACS*,
Jose M. Prince, MD, FACS*[#] and Ping Wang, MD*[#]

*Department of Surgery, Hofstra Northwell School of Medicine, Manhasset, NY

[#]Center for Immunology and Inflammation, The Feinstein Institute for Medical Research, Manhasset, NY

Keywords: MFG-E8, neonatal sepsis, lung injury, cytokines, MIP-2

Running title: Deficiency in MFG-E8 increases inflammation in newborn mice

This study was in part published as an abstract for the 101st Annual Meeting of the American College of Surgeons, October 4-8, 2015, Chicago, IL.
