Resilience-Based Network Design Under Uncertainty

Xiaoge Zhang, Sankaran Mahadevan, Shankar Sankararaman,
Kai Goebel

PII: S0951-8320(17)30351-4
DOI: [10.1016/j.res.2017.09.009](https://doi.org/10.1016/j.res.2017.09.009)
Reference: RESS 5947

To appear in: *Reliability Engineering and System Safety*

Received date: 22 March 2017
Revised date: 19 July 2017
Accepted date: 22 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A flexible nonlinear function is developed to characterize the component restoration behavior after the disruption
- We formulate the resilience-based network design optimization problem for both deterministic and stochastic cases of a network system
- We develop a probabilistic solution discovery algorithm and integrate it with a stochastic ranking to approach the problem
