To appear in: *Games and Economic Behavior*

Received date: 11 July 2013

Please cite this article in press as: Bando, K. On the existence of a strictly strong Nash equilibrium under the student-optimal deferred acceptance algorithm. *Games Econ. Behav.* (2014), <http://dx.doi.org/10.1016/j.geb.2014.05.009>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We analyze a preference revelation game for students in the student-optimal DA algorithm.
- We show the existence of a strictly strong Nash equilibrium through a simple algorithm.
- The equilibrium outcome from our algorithm is the same matching as in the efficiency-adjusted deferred acceptance algorithm.
- In a one-to-one matching market, it is the student-optimal vNM stable matching.
