This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Suggest the best combination of maintenance policies and actions (as redundancy)
- Implications for care quality of these maintenance alternatives
- Judgements given by a decision group comprising different areas of the hospital
- Integration of continuous time Markov Chains and a multicriteria approach
- The result is corrective, preventive and predictive maintenance (thermal analysis)
